Patient Category Code (PATCAT) Table - Headings Explained

Column Heading	Explanation
PATCAT Code	The "basic" PATCAT Code contains three characters. The first position is Alpha and it is used to identify the Sponsor Service of a uniformed service member, or one of the non-uniformed service groups tracked by the codes in the "K" and "R" series.
Sub-Category	Sub-categories are used with the "basic" PATCAT Code to define unique subsets patients within the "basic" code. Not all PATCAT codes have sub-categories, but where they exist, the PATCAT Code + Sub-category provides unique sub-groupings of patients while preserving a link to the "basic" PATCAT Code. The use of Sub-categories in conjunction with the "basic" PATCAT Code makes it possible to track sub-groups of interest, such as Officer and Enlisted, and also makes it possible to specify different billing rates for sub-groups within a "basic" PATCAT Code.
A&D List Category	This label identifies the header/category in which CHCS-ADT activity for a PATCAT Code will be printed on the Admissions and Dispositions (A&D) Report. Possible values are: Active Duty Retired Family Member Other
Pat Cat Summary	This label is used by the CHCS Medical Records Transfer and Retire functionality to identify and class records for a specified series or category.
